What is Safe2Tell?

Safe2Tell provides students, parents, and community members a safe and anonymous way to report information about any issues that concern their safety or the safety of others. Safe2Tell's reporting process is simple. Call to interact with a live, trained analyst (call takers) or fill out a form via the website or mobile app.

Submit urgent safety concerns to Safe2Tell.

Remember, Safe2Tell is available any time, any day.

Student Ambassadors

Safe2Tell started its student ambassador program in fall of the 2021-22 school year.

Each school year during the spring, we encourage and invite rising sophomores, juniors, and seniors to apply to be a Safe2Tell student ambassador.

Our ambassadors help provide insight and feedback on the Safe2Tell program and make sure that our work stays youth centered. This opportunity is offered through the Colorado Attorney General's Office.

We are excited to welcome our thirteen ambassadors for the 2023-2024 school year. They will be representing the following counties: Montrose, Logan, Jefferson, Douglas, Denver, Elbert, El Paso, and Boulder.

2022-2023 Data

1 in every 9 reports submitted is a duplicate report. This means we are receiving multiple reports about the same concern and that multiple people are speaking up!

Why is this a reason to celebrate? The bystander effect is not happening here! We are proud of our upstanders across the state of Colorado!

Mental Health Reports

Suicide threats are the most reported category during this school year and make up 13% of all reports.

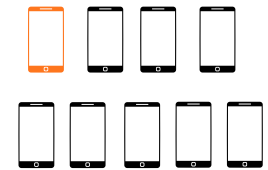

Take a look at the image on the left to see other mental-health related reports.

Report Types

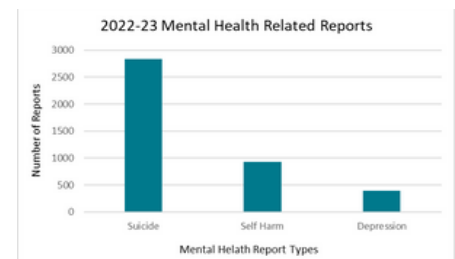

97.1% of all Safe2Tell reports during the 2022-2023 school year were valid. This means that the majority of reports were submitted for the right reasons to protect students and keep schools safe.

During the school year, the program received 22,486 reports! This is the highest report volume the program has ever received!

We are so proud of Colorado students for being advocates!

[Image description: Mobile phone figure representing how 1 in 9 reports were duplicates]

[Image description: 2022-23 Mental Health Related Reports. 2,840 suicide reports, 926 self harm reports, and 393 depression reports]

Can you solve this mystery puzzle?
